

Practice Enhancement Zoom Meeting

My Most Common Request For 2025...

“How Can I Increase My RVUs?”

Thursday, July 17, 2025

7:30pm Eastern/6:30pm Central

Nick Ulmer, MD CPC FAAFP

“Increase RVU” Follow-up

- Question related to Advanced Primary Care Mgmt and G2211...
 - APCM codes (G0556,G0557,G0558) are billed *each month* that you deliver those care management services and they are not “added on” to individual E&M sessions. They do not preclude use of G2211.

Errata

- After review of the session notes and Q/A sessions, I feel comfortable there are no further clarifications needed on the information shared.
- If questions arise, please reach out to me at
 - NUlmer@ProtimeLLC.com OR
 - 864-684-4248

The Practice Enhancement Education Platform for **GME**

GME Tracks: Focused sessions to help orient resident physician and non-physician providers in training to quickly understand documentation and coding concepts in the ambulatory and hospital space → capture revenue; promote quality attainment, compliance and sustainability to prepare for “the real world” of medicine

- **Ambulatory GME Core** Track: For GME programs (MD, DO, NPP) to augment the clinical training and better prepare to successfully embark on the “real world”
 - Office E&M, MWV, Medicare Preventive Services, TCM, Advance Care Planning, HCC, Population Health Mgmt, Business of Medicine
- **Hospital GME Core** Track: Training on optimal documentation for capture of medical necessity, quality, and compliance.
 - Hospital E&M, Two Midnight Rule, Medical Necessity (covers ICD conditions including pneumonia, sepsis, TIA/CVA, cardiac conditions, and others), CDI, and Hospital Quality
- Each has 8 sessions, no CME offered with GME education.
- **Each GME Core Track has a pre-test, the 8 sessions/track, and a post test with report with pricing set based on the GME training and size of the program**
